GLYCEROL SYRUP

ANTIFREEZE AND EMULSIFIER AGENT E422

DAYELET GLYCEROL is also a solvent agent, as well as a thickener and a sweetener, which makes it ideal for distributing flavours and colours in many food products, sweetening low-carbohydrate recipes and thickening liquor drinks. It is always used in low addition levels, between 0.2% and 0.5%. Due to all its properties, it is widely used in all types of preserves, syrups, ice creams, sorbets, sponge cakes, fairy cakes, muffins, cupcakes, chocolate and cream fillings (ganache), chocolates, bonbons, nougats, marzipan, etc. Combined with other sweeteners it may also be used in 'low-calorie, sugar-free' desserts and ice creams.

THIS PRODUCT IS:

sugar-free, gluten-free, lactose-free, egg-free, soy-free, fructose-free and salt-free.

IT IS ALSO SUITABLE FOR:

diabetics, coeliacs, vegetarians, vegans, and for people following weight control diets.

COMPOSITION:

glycerol.

NUTRITION INFORMATION PER 100g:

275 kcal/100g. Carbohydrates: 99% [99% of them are polyols]. Other hydrates: 0%. Nutritional fibres: 0%.

Fat: 0% (Saturated fat: 0%). Protein: 0%. Sodium: 0%.

Excessive consumption may cause a laxative effect.

It is not recommended for children under three years old.

Acceptable Daily Intake (ADR): 5 g per day.

LOW Glycemic index = 25.

SUGAR-FREE, GLUTEN-FREE, EGG-FREE, LACTOSE-FREE, SOY-FREE, FRUCTOSE-FREE, AND SALT-FREE.

DAYELET GLYCEROL is easily metabolised by most people. It is basically absorbed in the intestines and it is decomposed in the liver, which distributes it as well as the rest of carbohydrates. As it reaches the intestines, it is transformed in short-chain fatty acids which act as prebiotic agents favouring intestinal health. Its insulin response is not high and its Glycemic Index is very low. It is recommended not to consume it after eating pulses, vegetables or fruit, to prevent an excess of fibre consumption.
